

HG TIE BACK COVER

PRODUCT DESCRIPTION

HG TIE BACK COVER is a pre-manufactured PVC Thermoplastic cover designed to be placed over earth retention system tie-backs. It is used in blindside waterproofing applications along with the **HYDRO-PRUFE® PVC** thermoplastic waterproofing system. It is manufactured by a thermoplastic vacuum process. The core is a hard shell of thermoplastic designed to withstand the pressures of concrete placement with a PVC sheet membrane fused to the hard core to create one single cover for ease of installation. The **HG TIE BACK COVER** is designed for applications where the tie-back rods, or strands are not going to be detentioned or removed. For tie-backs that will be detentioned refer to **HYDRO-GARD** detail (SH-0113)

TECHNICAL DATA

Description

Weight	less <10 lbs
Overall height	23-5/8"
Overall width	21-5/16"
Cover Depth	6", 8", 10"

PACKAGING

Sold individually - not packaged

INSTALLATION

HG TIE BACK COVER is used to cover non detentioned tie-back in blindside shoring applications. Once the **HYDRO-PRUFE® PVC** waterproofing system is installed to the shoring, the **HG TIE BACK COVER** is installed over the tie-back head, and fastened through the pre-punched holes in the hard thermoplastic backing. The backside of the hard core has a depression for the placement of a waterstop. Prior to installing, insert **HYDRO-GARD Waterstop-B** or hydrophilic waterstop. Only place fasteners in pre-punched holes. Once securely in place, weld a 2" PVC flange to the **HYDRO-PRUFE® PVC** membrane and probe all welded seams. Refer to **HYDRO-GARD** detail (SH-0106) for further information.

AVAILABILITY

HG TIE BACK COVER is available from the manufacturer, vendors, or factory trained contractors.
