Hydro-Prufe[®] Earns ICC-ES Evaluation Report

Hydro-Prufe[®], manufactured by *HYDRO-GARD*, recently received an evaluation report (*ESR#3465*) from ICC Evaluation Service (ICC-ES), providing evidence that the PVC unreinforced thermoplastic sheet membrane meets code requirements. Building officials, architects, contractors, specifiers, designers and others utilize ICC-ES Evaluation Reports to provide a basis for using or approving *Hydro-Prufe[®]* in construction projects under the *International IBC and the IRC Code*.

ICC-ES President Shahin Moinian explains why ICC-ES Evaluation Reports are so important. “HYDRO-GARD can now reference the evaluation report to ensure building officials and the building industry that the product meets I-Code requirements,” Moinian said. “Building departments have a long history of using evaluation reports, and ICC-ES operates as a technical resource with the highest quality of product review for the building department. Final approval of building products is always in the hands of the local regulatory agency.”

ICC-ES thoroughly examined HYDRO-GARD product information, test reports, calculations, quality control methods and other factors to ensure the product is code-compliant. “We are excited in having this Hydro-Prufe approval and the product available for market,” according to Gregory Troyer, VP of sales.

A nonprofit, limited liability company, ICC-ES is the United States’ leading evaluation service for innovative building materials, components and systems. ICC-ES [Evaluation Reports](#) (ESRs) and [PMG Listings](#) provide evidence that products and systems meet requirements of codes and technical standards. ICC-ES also issues environmental reports verifying that products meet specific sustainability targets defined by today’s codes, standards, green rating systems and ICC-ES [environmental criteria](#). ICC-ES is a subsidiary of the [International Code Council[®]](#) (ICC[®]). For more information, please visit www.icc-es.org.

HYDRO-GARD is a manufacturer of roofing and waterproofing products. HYDRO-GARD is not only committed to providing the highest level of quality in its products and systems, but it is also equally committed to the complete satisfaction from its customers. HYDRO-GARD products are developed

with the concept of providing solutions to the ever growing issues that face the construction industry. Our products are designed and developed with the knowledge and input from decades of experience from a contractors point of view. HYDRO-GARD will continue to expand its product lines and maintain the level of quality that is expected of it and will continue to match solutions to the ever growing problems facing our construction industry.
